By the way, the model for the little hut is in Uhldingen on Lake Constance. The original can also be seen at the Landesgartenschau (State Garden Show) 2021.

Every Beginning Is Easy!

Exclusive Vegetation Starter Sets

The application requirements for different types of vegetation in the model landscape are as wide as a model shop's range of offerings. Sometimes it's hard to decide which colours and materials to use.

In order to make your decision easier and recommend the right NOCH materials for the various applications, our modellers have put together special Vegetation Starter Sets for you. Inside each set is a selection of products to suit the various topics. So, you can start right away and experience the effect and application of the materials. The products are suitable for all gauges. We made an effort to present as many products as possible in every Vegetation Starter Set. The quantities are sufficient for smaller areas. Since the item numbers are indicated on all the packaging and products, individual items can be purchased later at any time. In addition, each set offers a saving of at least 10% when compared to buying the products separately. Have fun discovering the variety and possible applications of these NOCH products!

No railway modeller can get around it: a railway embankment and its corresponding vegetation belong on every layout! Real-life railway embankments are usually overgrown and yet still (usually) rudimentarily maintained. The vegetation with grasses, groundcover and tendrils contributes towards the stabilisation of the railway embankment and thus to the operational safety of the line. With the Vegetation Starter Set by NOCH, you'll have everything at hand from the beginning!
