Figures Advent Calendar for H0, TT, N and Z Gauge

 The Figures Advent Calendar from NOCH has a long tradition. For many years, model railway enthusiasts and diorama builders have been looking forward to a small model figure every day before Christmas. The figures in the calendars for the H0, TT and N gauges are hand-painted. The figures in the Z gauge calendar are 3D Master Figures, i.e. they are 3D printed in full colour. The Figures Advent Calendar is the ideal gift for any model railway enthusiast.

Note: the Figures Advent Calendar contains no winter or Christmas figures.

Expected release: Already available at your local dealer.

There's Some Extra Movement in Your Christmas Festivities!

Christmas market pyramids are becoming increasingly popular. With the NOCH Laser-Cut wooden kit, you can add another highlight to your model railway Christmas market.

The pyramid rotates at a realistic speed. Both the impeller and the figures and decorations arranged in three storeys rotate. The candles are produced as 3D-printed parts.

The included electronics are connected to a 16 V model railway transformer and are suitable for AC and DC power connection. Suitable adhesive and detailed assembly instructions are included.

Expected release: November 2025

The Laser-Cut Kit Palace Linderhof on a scale of 1:87, H0

The NOCH development team spent over a year realising the Laser-Cut Kit Palace Linderhof. It consists of 1,007 laser-cut parts. These parts are cut from special laser-cut cardboard and some are engraved. The kit is supplemented by 113 individually modelled 3D printed parts of statues, ornaments and decorations. The model therefore corresponds perfectly to the original.

The scope of delivery includes the exclusive, eight-part Figures Set, consisting of the figures of King Ludwig II of Bavaria, Empress Elisabeth 'Sisi', Richard Wagner, two horses, a boy and two swan statues.

Special Laser-Cut Adhesive and detailed building instructions are included with the model kit.

Expected release: November 2025

Tall Hedges for Beautiful Parks

Castle and city parks can be beautifully designed with tall hedges. The hedges are flexible, allowing you to create curved hedges. The flocking gives the hedges a true-to-the-original look. The pack

contains two hedges, each 50 cm long (total length 100 cm) and is available in two shades of green.
Expected release: December 2025

each 50 cm long

Open-Air Staircases for a Special Ambience

The two outdoor staircases can be used beautifully in parks, squares or in front of stately buildings, such as Palace Linderhof or ahead of a romantically situated hotel. The staircases are made of hard foam and can therefore be easily adapted and customized to the installation situation using craft tools (see

from page 12). As you would expect from NOCH, the staircases are supplied already coloured by hand and therefore offer a maximum of realistic appearance for the professional model builder!

The Practical Work Station – The Perfect Companion for the NOCH Gras-Master 4.0!

The Gras-Master 4.0 Work Station for the NOCH Gras-Master 4.0 and the NOCH Gras-Master 4.0 PROFI is made of robust MDF and is supplied as a kit. It can be securely mounted on the wall using the enclosed screws, plugs and discs to save space.

The basic rack includes four brackets: one for the XL Flock Change Container, three for standard Flock Change Container or the Detail Flocker. There is also a separate holder for the Gras-Master handle and an integrated brush holder.

Two practical, separate storage boxes provide space for sieves, stamps or Grass Glue (ref. 61130), lids and brushes. These boxes can be easily removed from the shelf as required and replaced after use. The grass glue can therefore remain in the compartment while you are working, which keeps things tidy and prevents soiling.

This creates a clearly organised, functional work station where all tools and materials are easily accessible. This makes working with the NOCH Gras-Master 4.0 even more fun!

Expected release: January 2026

Note: Gras-Master, grass glue, change containers etc. are not included in the scope of delivery.

GRAS master 4.0
PROFI

60131 Gras-Master 4.0 Work Station

For wall mounting, including mounting materials
(without device and accessories)

G 1 0 H O T T N Z

Highlights:

- base shelf made of sturdy MDF
- 4 holders for change containers (1 suitable for XL Flock Change Container, 3 suitable for Flock Change Container or Detail Flocker)
- Gras-Master 4.0 handle holder
- brush holder
- storage box 1: storage of sieves and grass stamps
- storage box 2: storage of grass glue, lid and brushes
- mounting material included: 3 screws, discs and plugs

Perfect Electrostatic Flocking with the Latest Generation of the NOCH Gras-Master!

The latest generation devices offer many new advantages! They are rechargeable thanks to the integrated batteries. The innovative Flock Change Container System allows the grass fibres to be changed quickly. The adjustable PROFI device is available in a set with transport bags.

Available now from specialist dealers and at www.noch.com!

Finally: The Right Tool for Every Application!

NOCH Special Tool Set, 36 pieces

With the NOCH Special Tool Set, you always have everything you need to hand for your favourite hobby with your favourite brand. The contents of the set have been compiled by the professional modellers at NOCH and are therefore ideal for processing the various NOCH handicraft articles. The set includes cutting tools such as sharp scalpels, the matching NOCH cutting mat, a metal ruler and a fine saw. A fine side cutter for plastic, various files and abrasives,

a hand drill, tweezers, small bottles for colours, brushes, a NOCH pencil and lots of accessories round off the set. The tools are quickly stowed away in the matching tool bag and are therefore always ready to hand for the next job!

Expected release: November 2025

60050 NOCH Special Tool Set, 36 pieces

Contents:

- 1 cutting mat 220 mm x 150 mm, 2 mm thick
- 1 metal ruler, 150 mm
- 1 side cutter for plastic parts
- 3 files
- 1 double-sided modelling tool
- 1 fine scalpel
- 6 blades for scalpel
- 3 flexi sanding pads 90 mm x 19 mm, 6 mm thick
- 1 tool handle
- 1 scalpel blade for tool handle
- 1 fine saw blade for tool handle
- 1 hand drill
- 5 drill bits (1.0, 1.2, 1.4, 1.5 and 1.8 mm)
- 1 pair of straight tweezers
- 1 pair of curved tweezers
- 3 resealable vials, 10 ml
- 3 flat brushes, 6 mm
- 1 pencil
- 1 tool bag with zip fastener

Contents:

**The Perfect Tool Set for many Applications
Suitable for the NOCH Products!**

Laser-Cut

Using the scalpel, you can easily cut the components from the cardboard carrier along the metal ruler on the NOCH cutting mat. It also allows you to precisely cut transparent Film into matching windows.

Hard foam

The fine hand saw is ideal for cutting NOCH hard foam parts to size. Various files and abrasives are included in the set to smooth the cut surfaces.

Plastic modelling

The fine side cutter is suitable for cutting out plastic parts from moulded model kits. The burrs can then be removed or smoothed with the abrasives.

Planting trees

A classic in the NOCH range: the fir trees with planting pin. For even easier planting in future, use the small hand drill. With the five drill bits from 1.0 to 1.8 mm, you can also use the drill for fine work on models and buildings.

Planting grass tufts

The two tweezers not only make it easier for you to insert and attach fine parts to buildings and models, but they are also suitable for planting the popular NOCH grass tufts.

Colour

The three resealable bottles are ideal for mixing, diluting and storing individual colours. Also included: three simple brushes.

NOCH Superglue

Ideal for quick and permanent bonds. Perfect for bonding figures, laser-cut parts and many other materials. The adhesive dries very quickly and transparently, so that the bond is not visible. The resealable bottle ensures easy and economical dispensing. A reliable adhesive for hobbies, modelling and repairs – fast, clean and strong.

Expected release: November 2025

61106 Superglue
Contents: 20 g

This Makes the Work Even Easier!

NEW

NOCH Tools

Discover NOCH's range of tools specially designed for model railway enthusiasts. Whether you need a precision scalpel with replacement blades, flexible sanding pads for perfectly deburred parts, practical pipettes and bottles for precisely dosed paint applications, and much

more. Here you will find the tools you need for your creative model building projects.

Expected release: November 2025

60060 Softgrip Scalpel
incl. blade

The scalpel has a non-slip softgrip handle. The sharp blade enables precise cuts, e.g. for cutting window film and removing laser-cut components.

60061 Spare Blades, 5 pieces
for scalpel

Suitable for NOCH Softgrip Scalpel (ref. 60060).

60065 Modelling Scissors
stainless steel

With these sturdy Modelling Scissors, you can cut NOCH Lake Film, Landscape Crepe Paper, road foil and much more with precision. Not suitable for aluminium mesh.

60066 Modelling Fine Saw
incl. 2 saw blades, coarse and fine

The fine saw can be used to cut hard foam parts, e.g. walls and portals, as well as wooden struts from the NOCH Terra-Form System. Includes one coarse and one fine saw blade.

60067 Saw Blade, coarse, 5 pieces
for fine saw, 12.7 cm, 210 teeth

Coarse saw blade with 210 teeth. Ideal for cutting materials such as wood, plastic and hard foam to length.

60068 Blade, fine, 5 pieces
for hand saw, 12.7 cm, 270 teeth

Fine saw blade with 270 teeth. Ideal for making fine, precise cuts with fine edges in visible areas. Suitable for wood, plastic and hard foam.

60076 File Set, 6 pieces
different shapes

The fine model files in various shapes are suitable for metal, plastic and wood. They can also be used to easily rework NOCH hard foam parts.

60079 Flexi Sanding Pad Set, 3 pieces (coarse, medium, fine)
each 9 cm x 1.9 cm x 0.6 cm

The Flexi Sanding Pads are flexible and therefore adapt easily to the workpiece. They are washable with water and reusable. Each Flexi Sanding Pad has two different sides: coarse (60 and 100 grit) for removing material, medium (240 and 400) for sanding, and fine (600 and 1,000) for finishing and polishing.

60086 Modelling Side Cutter

The Modelling Side Cutter is suitable for plastic and fine wires. It can be used to easily separate plastic parts from a kit moulding and cut wires and cables to length.

60087 Flat-Nose Pliers with serrated edge

The Flat-Nose Pliers can be used to bend wires into shape.

60092 Precision Tweezers, straight

The Precision Tweezers can be used to attach small parts and position figures perfectly. The straight design makes it easy to pick up objects from above.

60093 Precision Tweezers, curved

The Precision Tweezers can be used to attach small parts and place tufts of grass perfectly in place. The curved design makes it easy to pick up objects from the side.

60099 Scriber, double-sided

The Scriber can be used to quickly and precisely draw marks in wood, plastic and soft metals. Unlike pencil marks, these marks cannot smudge and do not mix with the paint when painted over.

60100 Plastic Bottle with lid, 4 pieces

Volume: 17 ml

Ideal for mixing paints (e.g. from AMMO). The paint can be dripped directly from the bottle into an airbrush. Excess paint can be stored in the bottle thanks to the lid.

60101 Pipette, 5 pieces

Volume: 2 ml

The pipette can be used to pick up paints or adhesives (e.g. gravel adhesive) and then drip them into an airbrush, paint bottle or directly onto the material to be worked on.

60105 Nylon Clamp Set, 9 pieces

3 big, 6 small

The clamps are suitable for fixing parts, e.g. when two components of a kit are to be glued together.

The New **SOLUTION BOX** for your Realistic Model Railway Landscape!

With the new **SOLUTION BOX** for your model railway landscape, both beginners and experienced model builders can paint a small scene precisely and age it realistically. The comprehensive complete set offers all the materials, adhesives and paints needed to extensively design the miniature scene with vegetation and natural ageing effects on tracks and accessories. To achieve the desired result, the **SOLUTION BOX** includes the **SOLUTION BOOK** specifically tailored to landscape design.

Expected release: September 2025

The comprehensive **SOLUTION BOX was developed for model building enthusiasts:**

- Precisely matched colours and weathering products
- **SOLUTION BOOK:** 55 pages with instructions in 4 languages (DE, EN, FR, ES)
- Perfectly combinable with other **NOCH** and **AMMO Rail Center** products

4601203 (AMMO.R-1203)

SOLUTION BOX 'Railway Scenery'

All application-specific products

Scope of delivery:

1 **SOLUTION BOOK**

8 paints (5 acrylic, 1 thinner, 1 Dio drybrush, 1 shader),

3 effects, 2 adhesives, 1 acrylic texture, 1 fine cork ballast,

1 scatter grass, 1 Sculp-Tech hard foam sheet, 2 cork sheets

The **SOLUTION BOOK** for Realistic Modelling of your Model Landscape!

The **SOLUTION BOOK** 'Railway Scenery' is a helpful guide that is also available separately and provides tips and tricks for using **AMMO Rail Center** products on model landscapes. On 55 pages in 4 languages (DE, EN, FR, ES), you will learn everything you need to know about ageing and weathering model landscapes with **AMMO Rail Center** products!

Expected release: September 2025

High-Quality Modelling Brushes!

The new selection of six high-quality brushes (round, flat, corner brushes) is specially designed for the diverse techniques used in model making! Whether priming, painting intricate details, dry brushing or applying complex weathering effects such as oil, rust and streaks – these brushes are the perfect addition to the design of locomotives, carriages, figures, buildings, structures and dioramas.

Made from high-quality synthetic fibres, AMMO Rail Center brushes impress with their outstanding elasticity and long service life. In addition, thanks to their solvent resistance, they are ideal for many types of paint (acrylic, enamel and oil paints).

Ideal for all modellers who want to achieve demanding results!

Expected release: September 2025

4601151 (AMMO.R-1151)
Modelling Brushes Basic Set
6 brushes (round, flat, chevron)

The New Colours for Perfect Shading!

With ten new shaders in the most important shades, AMMO is expanding the Rail Center range with an innovative product for ageing and weathering models. The shaders are matt, highly fluid and transparent acrylic paints that have been specially developed

for shading and weathering effects. They make it particularly easy to achieve realistic results – both with an airbrush and with a brush.

The New Home Academy ‘Railway Bridge on the River’

The Online Course for Every Level!

Have you been wanting to take part in a seminar for a long time, but time or geographical constraints have got in the way? Our online modelling course offers you the perfect solution! Learn how to create realistic landscapes for your model railway from the comfort of your own home – flexibly, effectively and at your own pace.

This course is aimed at both beginners and experienced modellers who want to develop their skills. In clearly structured lessons, experienced chief model builder Florian Giwanski will teach you

basic and advanced techniques. You will learn how to design your diorama with realistic colouring, professional grassing and the supreme discipline of water.

A key advantage of our online course is its flexibility: you have access to the course content at any time, which is provided exclusively via a private YouTube video. There are no fixed times and no travelling – you can start, pause and rewind the video at any time to complete the lessons at your own pace. This gives you the freedom to work intensively on each technique and go back to details you want to deepen at any time.

After booking the course, you will receive an exclusive set of materials delivered directly to your home. These materials have been carefully selected to give you the best possible start or further development in the hobby of model landscaping.

Start your model railway adventure today – conveniently, flexibly and without restrictions. Book now and get the complete modelling experience straight to your home!

Note: The online seminar is only available in German and will be available to book online exclusively at www.noch.de from December 2025. You will also need tools (see pages 12–14) and a NOCH Gras-Master (e.g. ref. 60125).

Harmonious colour schemes

Stone by stone, the bridgeheads are brought into a harmonious overall picture.

Water march

The 2K Water Gel is used to model a natural river course.

Stamp Meadow

Meadows are created in several layers from individual grass tufts. Just like the real thing.

Homemade bushes

Our railway embankment vegetation makes it quite easy to create realistic bushes.

Rust thanks to pigments

The Laser-Cut steel bridge is aged with different pigment colours during assembly.

Realistic tracks

Thanks to AMMO Rail Center products, the tracks are given a realistic patina in several steps.
